

PRODUCT

Woodworking is a beautiful tradition in the Philippines. Each Acacia wood piece is hand-carved from sustainably harvested wood and treated with certified food safe finish.

Our designs are created to serve as both a functional aspect of your dining experience as well as a decor piece. We hope you enjoy their rich color and stunning grain!

ARTISAN

Each piece of our acacia wood collection is hand-crafted at a small family-run workshop outside of Manila in the Philippines.

Thanks to this work, they have become a cornerstone of their community providing training and employment for a team of 130 rural men and women. We also love that this enterprise is run by the women of the family!

COUNTRY

Handcrafted with love from the Philippines.
